

The B.Sc. program in Computer Science uses a senior seminar project as their “senior assessment”. Within this project the discipline specific knowledge, skills, and competencies areas include the following...

- Data Structures
- Computer Science
- Computer Systems
- Algorithms
- Switching Theory
- Software Engineering
- Networking
- Critical Thinking
- Problem Solving
- Programming Concepts
- Project Management

The ability to understand and apply principles in the aforementioned areas are the Computer Science degree program student learning outcomes.
