

Social and Behavioral Sciences

Psychology B.S.

The B.Sc. program in Psychology uses a comprehensive exam as their “senior assessment”. Within the exam, the discipline specific knowledge, skills, and competencies areas include the following...

History and Systems of Psychology

Psychology of Learning

Physiological Psychology

Experimental Psychology

Psychological Statistics

Because these areas are consistently assessed by the senior comprehensive exam, it is inferred that the ability to understand and apply principles in the aforementioned KSC areas are the Psychology degree program student learning outcomes.
