

2021AY Assessment Report (July 16, 2021)

Introduction

The 2021AY was the final year in a six-year assessment cycle begun during the 1516AY. Assessments, such as entry-level, mid-level, exit-level, alumni surveys, and co-curricular assessments, occur routinely each year. The covid-19 pandemic presented particular challenges to assessment in co-curricular programs, because students undertook much of their academic work in virtual environments. Though some students were in residence during the 2021AY, much of the co-curricular activities, such as athletics, band, and vesper choir, were either modified or curtailed. Nevertheless, working in the virtual environment meant many assignments were digital and could be readily uploaded to LiveText and subjected to rubric-based assessments. UAPB endeavored to continue its assessment and improvement process with minimal disruption by the pandemic. The 2021AY was the second of two years during which Problem Solving, Teamwork, and Lifelong Learning were assessed across the institution.

This report summarizes the results of our longitudinal assessments (entry-, mid-, and exit-level), rubric-based assessments of SLOs (institutional, school, and degree program), and co-curricular program assessments. Assessment activities are undertaken throughout the academic year. In May of each academic year, assessment data are summarized. In June, the summaries are reported to administrators, deans, directors, and particularly, department chairs. These administrators are asked to review their assessment data (during the July-August period) and prepare to discuss the data with faculty, staff, and other unit personnel when 9-month faculty return from summer break in August.

At the beginning of an academic year, returning 9-month faculty are presented with the summaries of assessment data. Faculty and administrators jointly decide what improvements occurred, what their current assessment data show, and how their unit will adjust instruction to improve student learning outcomes. Academic units are asked to answer several questions. The first question academic units answer is “What outcome improvements occurred during last academic year?” The answers to this question are juxtaposed with the academic unit’s plans for improvement from the preceding academic year in Appendix 1 of the annual assessment report. After reviewing the assessment data from the last academic year, academic units answer two more questions, which are “What did the assessment data from the last academic year show?” and “What will be done to improve the outcomes in the next academic year?” Answers to these two questions are included in Appendix 2 of the annual assessment report.

Co-curricular programs undertake similar data reviews and planning activities, either during the summer or at the beginning of an academic year. Co-curricular programs examine data summaries and attempt to answer the question “What outcome improvements occurred during last academic year?” Those responses are juxtaposed with the co-curricular program’s plans for improvement from the preceding academic year in Appendix 3 of the annual assessment report. As with academic units, co-curricular programs answer the two questions “What did the assessment data from the last academic year show?” and “What will be done to improve the outcomes in the next academic year?” Answers to these two questions from co-curricular programs are included in Appendix 4 of the annual assessment report.

Plans for improvement from academic units and co-curricular programs are shared with the Office of Assessment for inclusion in the annual assessment report, scheduled for completion by mid-October each year. The mid-October deadline allows units and programs to implement their improvement plans during the academic year. This is the basic cycle of assessment and improvement for the UAPB.

In addition to institutional SLOs, schools have adopted school-level SLOs common to all departments within a school. School-level SLOs may be assessed with the Association of American Colleges and

Universities (AAC&U) VALUE Rubrics, as are the seven institutional SLOs. Rubric-based assessments of institutional and school-level SLOs are conducted within the LiveText system (Watermark, Inc.), which is the institution's assessment management system. This system facilitates the creation of assignments, submission of student artifacts, rubric-based assessments, archiving of artifacts, and compilation of assessment data. The rubric-based assessment data for institutional and school-level SLOs are archived in LiveText and continuously available to department chairs, other administrators, and the Office of Assessment.

The Student Assessment Plan calls for longitudinal assessment at four points in time. Entry-level assessment metrics include high school GPA, class rank, and ACT scores. The mid-level assessment is a rising junior exam, which uses a standardized exam (ETS Proficiency Profile) to assess proficiency in general education knowledge areas, as well as Critical Thinking. Senior assessments take the form of either senior comprehensive exams or senior projects. Senior assessments represent exit-level assessments of discipline-specific knowledge, skills, and competencies. The Office of Assessment conducts surveys of alumni three and five years after graduation as a means of follow up assessment.

This assessment report attempts to capture the assessment activities that occurred during the 2021AY. Activities on the UAPB campus were clearly affected by the covid-19 pandemic. Approximately 75% of classes were in some virtual format during both academic terms. LiveText is a web-based management system, so rubric-based assessments of digital artifacts provided by students continued as before. Nevertheless, some programs were not able to fully capture assessment data. Similar to the spring 2020 term, co-curricular programs faced challenges in assessment during the 2021AY because of the nature of student interactions and limited presence on campus. Specific questions about the content of this report or the interpretation of assessment data should be referred to the Office of Assessment.

Institutional Student Learning Outcomes

Problem Solving

This is the second year that Problem Solving has been assessed by the entire institution. Approximately 405 rubric-based assessments of Problem Solving were conducted at UAPB during the academic year. Average Problem Solving scores ranged from a low of 55.4% (n=10, SD=19.9%) for freshmen to a high of 87.5% (n=28, SD=13.8%) for graduate students. Average Problem Solving scores monotonically increased from freshmen to middleclassmen (sophomores and juniors) to seniors and finally, to graduate students. Two aspects of Problem Solving, Implementing Solutions and Evaluating Outcomes, were consistently among the lowest aspects of Problem Solving across classifications.

Teamwork

One hundred ninety rubric-based assessments of Teamwork were conducted during the 2021AY. Average Teamwork scores varied little among classifications. Scores ranged from 70.4% (n=45, SD=22.0%) for freshmen to 80.0% (n=13, SD=14.1%) for graduate students. While no aspect of Teamwork was consistently the lowest, the facilitation of the contributions of others to the team was consistently among the lowest aspect scores of the Teamwork rubric. Contributes outside of team meetings was also consistently among the lowest aspect scores of Teamwork.

Lifelong Learning

Approximately 313 rubric-based assessments of Lifelong Learning were conducted during the 2021AY. Average Lifelong Learning scores were quite consistent among classifications. Scores ranged from 70.0% (n=125, SD=21.7%) for midclassmen to 74.9% (n=130, SD=21.8%) for seniors. Last academic year

Independence was generally the lowest aspect score. This academic year, Transfer and Reflection tended to be among the lowest aspect scores across classifications and appear to present the greatest challenges to undergraduate students acquiring the various Lifelong Learning skills.

School-level Student Learning Outcomes

SAFHS

The two school-level SLOs assessed in the School of Agriculture, Fisheries, and Human Sciences were Global Learning (an AAC&U VALUE rubric) and Human Needs and the Global Environment (rubric developed by SAFHS). The latter rubric is designed to assess students' understanding of economic profitability, environmental stewardship, social responsibility through the application of an interdisciplinary perspective. Nine assessments of Global Learning and eleven assessments of Human Needs and the Global Environment were conducted during the 1920AY. This year there were 41 assessments of Global Learning and 14 assessments of Human Needs and the Global Environment.

Average Global Learning scores ranged from 55.6% (n=3, SD=4.8%) for seniors to 70.0% (n=24, SD=19.8%) for middleclassmen. These scores are lower than Global Learning assessment scores during the 1920AY. For the second year in a row, students consistently scored poorest on the global self-awareness aspect of the Global Learning rubric.

Average Human Needs and the Global Environment scores ranged from 44.6% (n=2, SD=2.5%) for freshmen to 57.4% (n=12, SD=16.0%) for middleclassmen. No rubric based assessment of Human Needs and the Global Environment has ever assessed all ten aspects of this rubric. This year, all 14 assessments only assessed seven of the aspects of this SLO. Of the aspects that were assessed, Social Responsibility and Applying Sustainability were consistently among the lowest aspect scores.

SAS

The School of Arts and Sciences has been assessing Teamwork and Information Literacy for five years. Teamwork was one of the institutional SLOs assessed during the 1920AY and was addressed above. There were 331 rubric-based assessments of Information Literacy conducted in the School of Arts and Sciences. Average scores for Information Literacy ranged from 79.6% (n=125, SD=17.8%) for seniors to 84.0% (n=40, SD=19.3%) for freshman. It does not appear that Information Literacy scores increase as students progress through the School. Last year, different aspects of Information Literacy were lowest at each of the three classifications. However, this year, Critically Evaluate Information was consistently the lowest aspect score across all classification and represents the greatest challenge for students.

SBM

The School of Business and Management chose to assess Critical Thinking and Ethical Reasoning at the school-wide level. Fifty-two rubric-based assessments of Critical Thinking were conducted in the SBM this academic year. Average Critical Thinking scores during the 2021AY ranged from a low of 57.6% (n=7, SD=21.0%) for freshmen to a high of 80.0% (n=39, SD=16.8%) for middleclassmen. There was little difference in average Critical Thinking scores between middleclassmen and seniors (avg=73.0%). Context and Assumptions was generally among the lowest aspect scores for Critical Thinking across all classifications.

There were 18 rubric-based assessments of Ethical Reasoning conducted in the SBM during the 2021AY. Average scores ranged from 58.7% (n=8, SD=24.3%) for seniors to 70.0% (n=10, SD=10.7%) for middleclassmen. In past years, Ethical Self-Awareness was consistently a challenge for students across all

classifications. This academic year, Applying Ethical Concepts and Different Ethical Perspectives were the lowest aspect scores for senior and middleclassmen, respectively.

SOE

The School of Education assesses Intercultural Knowledge and Lifelong Learning as their school-wide SLOs. Lifelong Learning was assessed at the institutional level this academic year and is covered above. Twenty-six rubric-based assessments of Intercultural Knowledge were conducted during the 2021AY. Average scores for Intercultural Knowledge ranged from 76.7% (n=12, SD=14.0%) for middleclassmen to 86.3% (n=14, SD=11.4%) for seniors. Cultural self-awareness was consistently the lowest aspect of Intercultural Knowledge last year. This year Curiosity was the lowest aspect score for both classifications in which Intercultural Knowledge was assessed.

Degree Program Student Learning Outcomes

Degree program student learning outcomes are an integral part of the student assessment plan. Discipline-specific knowledge, skills, and competencies are assessed through senior comprehensive exams and senior projects. These are summative assessments. Beginning in the 1920AY, departments identified a single degree program SLO to be assessed across their curricula. Curriculum maps identifying courses in which the SLO was introduced (typically a 1000-level course), reinforced (typically a 2000- or 3000-level course), and assessed for mastery (typically a 4000-level course) were created. The assessment instrument for each degree program SLO was identified by departments. Since the assessment instrument was not necessarily a rubric, degree program assessments do not necessarily reside in LiveText, though some might. Each department summarizes and interprets the assessments of their degree program SLOs. These assessment results as well as plans for improvement are included in the final draft of the annual assessment report (i.e. Appendices 1 & 2 scheduled to be complete September 15, 2021).

Co-curricular Student Learning Outcomes

The Office of Assessment works with co-curricular units to identify what students gain from interaction with respective co-curricular programs. Assessments included a variety of direct and indirect methods, such as self-assessments, retention and graduation rates, rates of completion of specialized tests or programs, rates of employment, and focus groups. In most cases, co-curricular programs collected and summarized their data independently. Each co-curricular program identified steps to improve student outcomes and reported back to the Office of Assessment. Some co-curricular units were challenged during the covid-19 pandemic because of irregular contact with students. Nevertheless, co-curricular units continued to serve students and participate in the assessment and improvement process. Summaries of assessment activities, data analyses, and plans for improvement of student outcomes are incorporated in the annual assessment report (see Appendices 3 & 4).

Longitudinal Assessment

Entry-level

UAPB typically tracks three metrics when students enroll for the first time. Those metrics are high school grade point average (GPA), high school rank, and ACT (or equivalent) score. The covid-19 pandemic altered some enrollment requirements, including the requirement to provide an ACT score. Nevertheless, the majority of new students did provide an ACT or an SAT score. The Office of Assessment began with data from the 0607AY (i.e. Year 1) and includes data from the 2021AY (i.e. Year 15).

The positive trend in the average high school GPA that began in the 1011AY (Year 5) appears to have curtailed around the 1617AY (Year 11). The last six years indicate that average high school GPA was approximately 2.9 and fell about a tenth of a point in the 2021AY (Figure 1). Over the 15-year period, average ACT score shows a positive trend. A review of the last 6 years shows that the average ACT score has leveled (Figure 2). In five of the past six years, average ACT scores ranged from 18.2 to 18.4. However, average ACT score during the 2021AY was 16.8.

Figure 1. Average high school GPA of incoming freshmen for the past 15 years.

Figure 2. Average ACT score of incoming freshmen for the past 15 years.

There is significant improvement in average high school class rank (i.e. average ranks closer to one means students were closer to the top of their respective graduating classes) over the past 15 years. However, data from the last six years indicate a trend toward students that, on average, are further from the top of their high school class (Figure 3). During the 1617AY average high school class rank was 38th but average high school class rank was 49th during the 2021AY.

Figure 3. Average class rank of incoming freshmen for the past 15 years. Lower averages depict freshman ranked closer to the top of their high school class (i.e. negative trend = improvement).

The ACT sub-scores for math, English, reading, and science all continue to show significant positive trends for the 15-year period under consideration. However, considering only the last six years of data, all these subscores are either level or declining. Sub-scores fell from the 1920AY to the 2021AY by an average of 10.3% with the largest declines in the areas of English and reading. Incoming freshmen are trending toward being less prepared for college. The freshman class of during the 2021AY might face academic challenges that could warrant special attention and appropriate resource allocation.

Mid-level

The ETS Proficiency Profile is used as the University’s mid-level assessment (i.e. rising junior exam). The Proficiency Profile was first administered during spring 2018. The Proficiency Profile tests the same skill areas as the former exam (the ACT CAAP) including reading, writing, math, natural sciences, humanities (i.e. arts & literature), and social sciences. The Proficiency Profile also provides an assessment of Critical Thinking. We scaled scores from both exams to represent percentages of maximum possible scores so that data were comparable between exams.

UAPB administers the Proficiency Profile to students that have between 45 and 60 credits toward graduation. We use an electronic version of the exam, so it may be completed by students at their convenience. Students who fail to take the exam when instructed to do so receive an academic hold on their account. The hold prohibits registration for the next academic semester until the student completes the exam. This year, we incentivized performance on the Proficiency Profile by entering student that achieved an overall score of 30% or higher in a drawing for a \$100 VISA gift card. This was advertised at the time the exam was announced and again when each reminder to take the exam was issued.

We examine trends for scores in each skill area over time. The only knowledge area that is not showing a significant decline over the 16-year period is reading. However, we note that reading has declined from a high of 47% in the 1718AY to a low of 32% in the 2021AY. Other knowledge areas clearly show significant declines over the 16-year period. The ETS Proficiency Profile also creates a percentile for Critical Thinking among individuals taking the exam nationwide. In the four year since switching to the ETS Proficiency Profile, students at UAPB averaged between the 21st and 27th percentile.

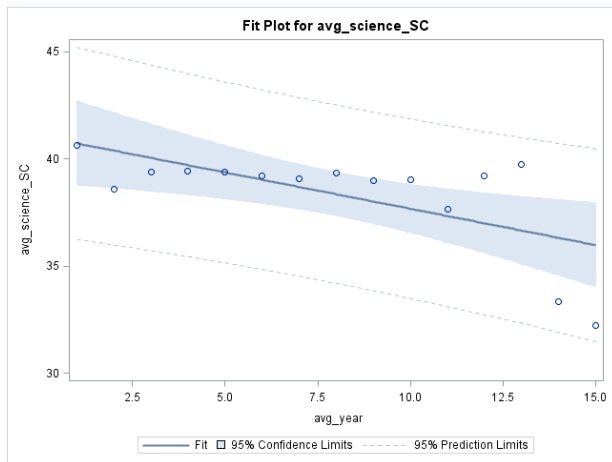

Figure 6. Average science scores for rising juniors during the past 16 years.

Figure 7. Average arts & literature scores for rising juniors during the past 16 years.

Figure 8. Average social science scores for rising juniors during the past 16 years.

Exit-level

Senior assessments at UAPB take one of two forms, senior comprehensive exams or senior projects. The majority of departments use senior comprehensive exams as the senior assessment for their degree programs. The School of Business and Management uses the Peregrine Major Field test as the senior comprehensive exam for Accounting and Business Administration. The School of Education uses Praxis II as their senior comprehensive exam in teacher education programs. The Nursing Program uses the RN Comprehensive Predictor as their senior comprehensive exam. Other departments have developed their own senior comprehensive exams. Senior comprehensive exams are typically administered using a Scantron form. Forms are delivered to the Office of Assessment for grading. The Office of Assessment reports the scores back to the department and in the institution's student information system (i.e. Colleague). A few degree programs are using senior projects. Senior projects are graded with a rubric and the rubric scores are reported to the Office of Assessment for compilation and entry into Colleague.

The covid-19 pandemic forced most classes to be virtual during all or part of the 2021AY. Hence, pencil and paper versions of the senior comprehensive exam, completed using a Scantron form, were not necessarily possible during the fall 2020 term. Administration of a senior comprehensive exam was optional during that term. Senior comprehensive exams were required during the spring 2021 term. Some departments administered the senior comprehensive exam electronically and simply reported the student scores to Assessment. This removed an opportunity for the Office of Assessment to summarize performance on the senior comprehensive exam by knowledge, skill, or competency area.

Senior assessments have been scaled on a proportional basis (i.e. percentage/100) so that tests from different units can be combined and the institutional performance of seniors can be tracked through time. Only the first administrations of senior assessments have been utilized in these analyses. Some departments require students to retake the exam if a specific score was not achieved on the first attempt. The Office of Assessment has compiled average senior assessment scores each academic year for 16 years. There is a significant positive trend in average senior assessment scores over this period (Figure 9).

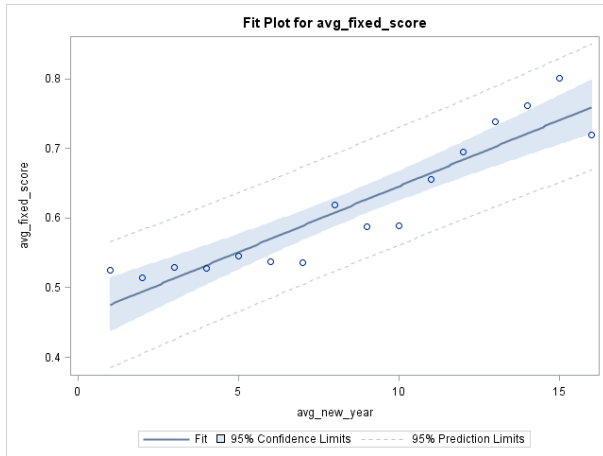

Figure 9. Average scores for first administrations of senior assessments during the past 16 years.

The average senior assessment score during the 2021AY (72%, n=305, SD=21%) was somewhat lower than the average score during the 1920AY (81%, n=196, SD=14%). The proportion of students scoring above 70% on their senior assessment (Figure 10) on their first try remains relatively high. The percentile performance from students taking the Peregrine Major Field test and the Praxis II exam are averaged into overall average performance. However, the threshold score for passing is not 70% on those exams. Specific performance data for those two exams can be found in the assessment data summaries for departments within the SMB and the SOE.

Figure 10. Relative frequency distribution of senior assessment scores during the 2021AY with the 70% threshold (vertical line) indicated.

Senior comprehensive exams that continue to be administered using Scantron forms can help identify discipline-specific knowledge, skill, and competency areas. Those departments may track overall performance (as indicated above) as well as performance in specific knowledge areas. Like senior comprehensive exams, senior projects also identify discipline-specific knowledge areas. Performance in specific knowledge areas is summarized for departments that make those data available to the Office of

Assessment. Those departments can identify knowledge areas of concern and specifically address those areas with improvement plans. Such plans would be found in Appendix 1.

Alumni surveys

We were unable to survey the FA17-SP18 cohort of alumni. No valid emails were collected for graduates during that academic year.

For the FA15-SP16 cohort (five years after graduation), a total of 321 surveys were sent out to alumni, 6 responses were sent back giving a response rate 5.9%. The data showed that 61% of the respondents have a job in their field and 88% have obtained a master's degree. Only one of the respondents participated in specialized programs. When asked what academic skills were gained from the university, the students identified time management communication, teamwork, water quality research, networking, and research skills. The data also showed that the students had to learn skills like negotiating contracts, lesson planning, and upper level computer skills while on the job.

When asked about co-curricular activities, the data showed that 52% participated in at least one co-curricular activity while in school. Students recommend more mentoring for future teachers, and events that talk about life after college as a means of improving their educational experience. About 72% of the cohort participated in an internship and 44% of those internships led to a job in their field of study. When asked about the overall academics at the University, the data showed that the students were somewhat satisfied. It appears that they showed the most concern toward the quality of the academic facilities. The non-academics overall response data showed that the students were somewhat satisfied. Most concern was shown for the living and dining facilities.

The response rate to this survey was low but showed an increase relative to previous years. The data indicated that many students are pursuing post baccalaureate degrees. Students wanted to learn more life skills and were generally satisfied with the education they received but were concerned about the facilities maintenance and upkeep. The survey also showed that a high proportion of student internships led to jobs in the respective field of study.

Summary of longitudinal assessments

Average entry-level assessment scores have declined in recent years. Average mid-level assessment scores are declining. Average exit-level assessment scores are generally improving, though there was a decline this year compared to last year. The proportion of seniors passing their senior assessment on the first attempt is increasing. The university requires a minimum score of 70% on a senior assessment to graduate. Students not passing the senior assessment on the first attempt subsequently retake the exam. The marked improvement in discipline-specific knowledge, skills, and competencies concurrent with a decline in general education accomplishments warrants attention.

Data for the last six years suggest entering freshman were less prepared for college. Entry level assessment scores during the 2021AY were markedly lower than the past. Mid-level assessments indicate student performance is below average. Average scores in knowledge areas tested by the ETS Proficiency Profile are below the 50th percentile and scores continue to decline. The average performance during senior assessments is improving. The university requirement that seniors score 70% or better on their senior assessment may be responsible for senior assessment scores continuing to improve. Rising juniors

are required to take, but not necessarily pass, the ETS Proficiency Profile. There is a relationship between a requirement to meet a minimum standard on an assessment and the average performance on that assessment. Incentivizing performance on the ETS Proficiency Profile did not seem to affect student performance. Nevertheless, the Office of Assessment will continue to examine means of incentivizing the rising junior exam. The university might consider implementing some modest required level of performance on the ETS Proficiency Profile to encourage students to do their best work on that assessment.

Other Assessment Activities during 1920AY

Acquisition of the EDA and ELDA from Watermark

The School of Education requested assistance from the Office of Assessment to acquire discipline-specific disposition assessments. The Educational Disposition Assessment (EDA) and the Educational Leadership Disposition Assessment (ELDA) were purchased from Watermark by the Office of Assessment on behalf of the School of Education in November 2020. The EDA and ELDA are LiveText documents that were delivered to the Assessment Office and shared with the faculties of Curriculum and Instruction and HPER. The EDA and ELDA can be associated with specific assignments in either department and assessed as any other AAC&U rubric. The acquisition of these disposition assessments specifically supports the SOE effort to maintain CAEP accreditation. Data from these assessments are captured and archived in LiveText just like any other rubric based assessment.

Use of Field Experience Module

Two academic units utilized the Field Experience Module during the 2021AY. The School of Education created field experiences for students enrolled in a variety of courses. Specifically, the SOE attached the EDA to these field experiences, such that an external assessor and the instructor of record could use the EDA to assess a student's skills and competencies. Furthermore, the students were able to conduct a self-assessment using the EDA. All these assessments are captured and archived within LiveText, rendering them available to the SOE and the Office of Assessment. Hence the rubric based assessments using the EDA support both the HLC and the CAEP accreditation efforts. Regulatory Science also used the Field Experience Module this year.

Computer-Based Administration of ETS Proficiency Profile

During the fall 2020 term, the Assessment Office worked with University College to identify students who needed to take the rising junior exam (i.e. students with 45-60 credits toward graduation at the beginning of the fall 2020 term). The Office of Assessment notified students, registered them to take an electronic version of the ETS Proficiency Profile, and sent out two reminders to the students to take the exam. The exam could be taken from any location using lock-down browser technology. The process seemed to work well, but a high proportion of students ignored all the reminders and ended up with a hold on their account precluding preregistration for the next term. Students who contacted the Assessment Office were again provided with the means to take the rising junior exam electronically. The process of notification, registration, test administration, and academic holds was repeated during the spring 2021 term. The process seems to be working as intended with a few exceptions.

In several cases, academic advisors have told students they were required to take the rising junior exam when those students were not on the list produced by Assessment's active Excel file. In those cases, the advisors were counting total credits accumulated at UAPB, rather than credits counting toward graduation. For example, if a student took Basic English, their credit total might be 47, but only 44 of the credits count toward graduation. In such a case, the student is not required to take the rising junior exam

and should not have an academic hold precluding preregistration. Such a student would be identified in the following term when their credits toward graduation fall within the 45-60 credit range. Any academic advisor that is unsure of the status of a student with respect to the rising junior exam should have that student contact the Assessment Office.

Meeting attendance

The covid-19 pandemic precluded travel to face to face meetings during the 2021AY. However, personnel within the Assessment Office participated in a virtual meeting of the Arkansas Association for Assessment of Collegiate Learning held April 22, 2021.

Future Assessment Activities

Assessment instruments for degree program student learning outcomes

The Office of Assessment continues to work with departments to create curriculum maps, identify degree program learning outcomes, and develop authentic assessment opportunities. For example, the Office of Assessment has identified standards and SLOs for Rehabilitation Services and Biology that could be used to assess degree program SLOs. The Office of Assessment has created a number of degree program or discipline specific rubrics on behalf of academic units. UAPB continues to work toward the best practice of rubric-based assessments of degree program SLOs in concert with our current practice of rubric based assessments of institutional and school-level SLOs.

Appendix 1 – Curricular Program Outcome Improvements During the 2020-21AY

Given that a small department like AQFI is dominating the assessment of this SLO at the graduate level, the campus at large needs to get more serious about assessment. | |
| | | | |
| | Global Learning | Continue reviewing and be mindful of the data, and continue to seek improvement within AQFI Dept. However, our undergraduate sample sizes in AQFI continue to be too small for meaningful interpretation. Given that a small department like AQFI represents nearly all the assessment of this SLO at the graduate level, SAFHS clearly needs to get more serious about graduate assessment. | |

Appendix 1 – Curricular Program Outcome Improvements During the 2020-21AY

| Department/Unit | Student Learning Outcome | What will be done to improve the outcome in 2020-21AY? | What outcome improvements occurred during the 2020-21AY? |
|-----------------|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| | | <p>Continue reviewing and be mindful of the data, and continue to seek improvement within AQFI Dept. However, our undergraduate sample sizes in AQFI continue to be too small for meaningful interpretation. The freshmen-level assessments are few because we have only one FR-level course (AQFI 1102). Excessive assessment of that individual course could be taxing to the instructor.</p> | |
| | <p>Human Needs and the Global Environment</p> | <p>Continue reviewing and be mindful of the data, and continue to seek improvement within AQFI Dept. However, our undergraduate sample sizes in AQFI continue to be too small for meaningful interpretation. Given that a small department like AQFI is dominating the assessment of this SLO at all levels, SAFHS needs to get more serious about assessment.</p> | |
| | | | |
| | <p>Aquaculture and Fisheries Science B.S. SLO – Oral Communication (AAC&U rubric)</p> | <p>Continue reviewing and be mindful of the data, and continue to seek improvement within AQFI Dept. However, our undergraduate sample sizes in AQFI continue to be too small for meaningful interpretation, and FR assessments aren't always</p> | |

| | | <p>available. In the future, it be good that faculty remember the purpose of assessment, which would likely adjust the score distributions across the different student classifications. Undergraduates assessing consistently higher than graduate students is an unlikely scenario, especially in oral communication.</p> | |
| | | | |
| | <p>Aquaculture and Fisheries Discipline Specific Knowledge, Skills, and Competencies</p> | <p>To help students better prepare for future exams, the department planned to <u>prepare study guides</u> for all 7 tested subjects. However, although faculty have had several years to complete these, they are still are not completed for all subjects. We will continue to push to get all study guides done. Regardless of sample sizes, there is only minimal interpretation possible for these test scores since students have only recently been required to pass the exam with a 70% (as of May 2020). In fact, the first senior required to pass (Juan Ramos) did in fact pass with a 72% this past spring. Our expectations are that when the 70% passing score becomes more ingrained, seniors will take the exam more</p> | |

| | | positively impact the overall school's results. | |
| | | | |
| | Teamwork | | |
| | | | |
| | Lifelong Learning | A&D courses require students to engage curiosity, initiative, and independence. Rubrics for art projects always include transfer of knowledge and skills as well as reflection (verbal and written) on process, knowledge, skills and completed product. We will make a concerted effort to collect assessment data for lifelong learning in the future and share results. | |
| | | | |
| | Information Literacy | A&D majors are often required to conduct research on specific artists (in relation to studio projects and art history). We intend to pay more attention to assessing the two lowest components (critically evaluate info and uses info effectively. | |
| | | | |
| | Teamwork | Lower mean scores for A&D majors may be related to little teamwork opportunities within our courses. Few collaborative projects are required, almost all the art studio projects and written papers are completed independently. Occasionally, we will require a group presentation. We will | |

Appendix 1 – Curricular Program Outcome Improvements During the 2020-21AY

|---------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Academic Skills and Developmental Services | Students will show improvement in their reading comprehension and vocabulary skills. | Although there were statistically significant results, most students did not meet the targeted reading comprehension cut score. We will order a new textbook, develop new assignments, and increase our outreach to students. | A paired t-test was performed to determine if a statistically significant difference had occurred between mean pretest and mean post-test scores. Unlike in previous years, the results were not statistically significant. |
| UAPB Quality Initiative “African-American Male Student Persistence Initiative: Leadership Development” | Students will gain "leadership abilities and positive self-concepts." | <p>(1) Seek to provide additional professional and peer mentors to freshmen and sophomore students.</p> <p>(2) Capture data at mid-term and again at the end of the fall and Spring semesters through administering a brief survey to assess the level of participation in student organizations. This process will be used to aid in guiding students to the right organizational fit for them on an individualized basis.</p> <p>(3) To broaden the educational experience of students and to assist with retention and graduation rates a monthly promotion of "Study Abroad" opportunities. Announcing to students that some funding is provided through a joint partnership with the MOC Initiative and the UAPB International Program Office.</p> | <p>1) Faculty Advisors were proactive in service provision to the students served. A joint effort with enrollment management enable improved service delivery. Collaboration was also sought out with respect departments as well, to better insure a smooth transition for students to their major departments.</p> <p>(2) There was the inability to meet this subjective because of the issues presented by the COVID Pandemic. Plans are in place to pursue this measure again beginning Fall 2021.</p> <p>(3) Broadening the educational experiences of our students is an ongoing process. However, because of the COVID pandemic travels abroad were postpone this year. We hope to regain this venture in the near future.</p> |

| Carolyn F. Blakely Honors Program | Our goal is to produce a program that attracts and retains high-achieving scholars with an interest in becoming well-educated and well-rounded people willing to make their respective communities and nation a better place to live, work, and learn. | We will continue to make use of our Blackboard course/organization as a means of incorporating measures to gauge responses to the Scholars Seminars and campus/community service opportunities. In addition to documenting the plans of our graduates in our senior send-off book, we will also place the graduation survey link in Blackboard to centralize the data on our graduates. Finally, we will encourage our graduates to enroll an Honors Program Alumni Remind text group before they leave so they are better accessible for updates. | Established the Founding Chapter of The National Society of Collegiate Scholars Honors Society (NSCS) for freshmen and sophomores. There were 36 new members. NSCS provides additional scholarship opportunities and scholarship reviewers are available for student applicants. We collaborated with the University of Arkansas at Fayetteville and Honors Arkansas workshops and are planning future projects for the upcoming school year. Due to the pandemic, students were not allowed to travel out of the country. However, the Honors Program will be partnering with the Office of International Programs by providing workshops on how to apply for national scholarships to travel abroad for the next school year. |

| | | <p>not understand the job search process and skills for obtaining a job. We still have a lot of students that have not connected to career services. The results did a present a good representation of the value of career services.</p> | <p>person dedicated to workshops that will be offered every semester. These workshops will be designed to assist students with the career development processes. The workshops will be conducted in and outside of the classroom settings. I will also work closely with the committee that I will be assigned to in the next two weeks that will be developing the Strategic Plan for the University. Per the VC for Academia, the plan will include building a stronger relationship between career services and academia.</p> |
| <p>Office of Student Involvement & Leadership</p> | <p>Students involved with the Office of Student Involvement & Leadership gain valuable experience in network building, planning events, leadership and professional pursuits. OSIL offers valuable programs in the field of Student Activities allocations, mentoring, diverse and international programs, fraternity and sorority life, leadership development, student support programs and services (Black History Month, Women's History Month Celebration, Unity Fest) and more.</p> | | |

Appendix 4 – Co-Curricular Program Summaries and Plans for Improvement During the 2021-22AY

| Co-Curricular Area or Program | What should students gain from your service or program? | What did the 2020-21AY assessment show? | What will be done to improve the outcome in 2021-22AY? |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|--------------------------------------------------------|
| | <p>Additionally, OSIL offers the opportunities for students to gain leadership in co-curricular programming outside of the classroom. Many of the organizations under the umbrella assist in creating events, programs and occasions for the development of the students. Leadership in the following areas are sought out by under the umbrella of governance, archives, political and student body awareness, student programming, and fraternity/sorority life;</p> <p>Following the pursuits of the persistence and retention mechanisms, we asses all of our Registered Student Organizations (RSO) at the end of the year, to obtain particular data information and assess their involvement in programming. Additionally, we ask of their support to better improve the Office of Student Involvement & Leadership area.</p> | | |
