

Registering a WIRELESS DEVICE with Technical Services

Some wireless devices such as gaming consoles, Smart TVs, and streaming devices (Apple TV, etc.), cannot login directly to UAPB's wireless network using your username and password. For these devices, you will need to complete the Wireless Device Registration form to register the device with the wireless network.

NOTE: This form is not for standard wireless devices like mobile phones, tablets, or laptops. To connect these devices to the wireless network manually, follow the steps in Connecting to UAPB's wireless network.

Access the Wireless Device Registration Form. (<https://uapb.tfaforms.net/66>)

Complete each field in the form:

Date

First Name & Last Name

Phone

UAPB ID Number – If you are a UAPB student, this is the seven-digit number.

Location – Choose your campus building location from the drop-down list.

Room Number

Email – Enter your email (ending with @uapb.edu)

****Confirmation will ONLY be sent to UAPB issued email accounts****

Device Manufacturer/Brand

Description of Device

Wireless MAC Address of Device – The MAC address (also called the “wireless address” or the “WiFi address”) is often listed in your device's settings menu.

For help in finding your device's MAC address, refer to your device manufacturer's support website.

Click Submit.

It may take up to two or three days to process the information and register your device.

Technical Services will notify you by email when your device is registered.
